2:25-3:10	Building Robust ETL Pipelines with Power BI Dataflows	Intermediate	Tony McGovern	Power BI dataflows give us the ability to run data transformation activities at scale while providing a single view for scheduling, monitoring, and managing complex ETL pipelines. In this session, see how simple it is to build robust, low-code ETL pipelines with Power BI dataflows. We'll walk through standard data transformation activities using APIs as our source data and landing that data as fact and dimension tables on the Power BI Service.	45 min
3:15-3:35	Licensing Overview	All	Anna Ye	A quick overview of Power BI licenses: Power BI Pro; Power BI Premium; E5; G5; Power BI embedded	20 min
3:40-4:25	Secure Embed Link with Power BI	Intermediate	John Kerski	Secure Embed Link (https://powerbi.microsoft.com/en-us/blog/easily-embed-secure-power-bi-reports-in-your-internal-portals-or-websites/) is a wonderful feature to embed Power BI Reports in other websites or SharePoint Online. But how do you tailor it to show the right page, use a bookmark, or hide the filter pane? In this session we show you how to customize Secure Embed Link with simple updates, resulting is better-looking Power Bi Reports. We also discuss common issues you'll run into with Secure Embed Link and the enterprise and how to avoid them. (https://www.definitivelogic.com/preparing-your-organization-for-secure-embed-link/).	45 min
4:30-4:45	Wrap-Up	All	Crew	Closing and thanks for coming! Next meetup is on March 26th featuring Alina!	15 min
